

KIKS White Paper

The KIKS project is dedicated to providing free information through a free app. This app simulates real-time energy expenses based on user-provided data.

Key Features of KIKS App:

- Calculate energy consumption expenses.
- Estimate required number of solar panels.
- Determine the return on investment for renewable energy projects.
- Provide a detailed energy-saving report.

All this information will be delivered through the KIKS App, which will be available as the KIKS token grows in value.

Our Commitment:

The KIKS project is committed to promoting renewable energy awareness and delivering valuable insights through our innovative app.
